Arctic Animals — Answer Key

Did you know?

- Polar bears' fur only looks white; the individual hairs are actually translucent, with black skin underneath.
- Arctic foxes grow a thick white winter coat that turns brown or gray in summer to match the changing landscape.
- Many arctic animals have compact bodies and small ears, an adaptation that helps them conserve body heat.
- The arctic tern makes one of the longest migrations of any animal, traveling from the Arctic to the Antarctic and back each year.
