Baby Animals — Answer Key

Did you know?

- Many baby animals born in spring, like lambs and chicks, are called "precocial" because they can move around almost immediately after birth.
- A baby rabbit is called a kit, a baby goat is called a kid, and a baby goose is called a gosling, each species with its own specific name.
- Spring births are common among many farm animals partly because the timing lines up with milder weather and more available food.
- Baby animals are associated with Easter partly because lambing and hatching season genuinely falls in early spring in much of the Northern Hemisphere.
