SEAGULL
SPARROW

SWAN
VULTURE
WOODPECKER

Birds — Answer Key

Did you know?

- Birds are the only living animals with feathers, a feature unique to them among all currently living species.
- Hummingbirds are the only birds able to fly backward, thanks to their unique wing structure.
- A group of crows is called a murder, one of many unusual collective nouns for birds.
- Some bird species can mimic sounds from their environment, including human speech and other animals.
