Computer Terms — Answer Key

Did you know?

- The first electronic general-purpose computer, ENIAC, was built in 1945 and weighed nearly 30 tons.
- The word "bug" for a computer error is often traced back to a real moth found stuck in a relay of an early computer in 1947.
- A single modern smartphone has far more computing power than the computers used to send astronauts to the Moon.
- The first computer mouse, invented in the 1960s, was made of wood.
