Date Night — Answer Key

Did you know?

- Candlelight is specifically associated with romantic settings partly because of its soft, warm, flattering quality of light.
- The idea of a scheduled, deliberately protected "date night" for established couples has become a more explicitly named practice in relationship advice over recent decades.
- Restaurant reservations for this specific evening are typically booked well in advance, since demand for tables genuinely spikes on this one night.
- Even simple, low-cost activities can function as a meaningful date night; the deliberate, focused time together matters as much as the setting itself.
