Y	N	E	D	I	O	B	H	X	S	L	X

Did you know?

- Deserts are defined by low rainfall, not necessarily high temperatures; Antarctica is technically the largest desert in the world.
- The Sahara, the largest hot desert, can have surface temperatures well over 100 degrees Fahrenheit during the day.
- Many desert plants and animals have specific adaptations for storing water and surviving with very little of it.
- Deserts cover roughly a fifth of Earth's total land surface.
