Desserts — Answer Key

Did you know?

- Ice cream requires constant churning while freezing specifically to prevent large ice crystals from forming.
- Chocolate chip cookies were reportedly invented by accident in the 1930s, when a baker ran out of regular baking chocolate.
- Meringue gets its structure from air whipped into egg whites, which then sets when baked at a low temperature.
- Many classic desserts, like flan and creme caramel, rely on caramelized sugar as their defining flavor.
