SPINOSAURUS

TRIASSIC

VELOCIRAPTOR

VERTEBRATE

Dinosaurs — Answer Key

Did you know?

- Birds are now widely considered by scientists to be the closest living relatives of dinosaurs, descended directly from a branch of them.
- Not all dinosaurs were enormous; some species were roughly the size of a chicken.
- The word "dinosaur" comes from Greek words meaning "terrible lizard," though dinosaurs weren't technically lizards.
- Fossils, our main source of dinosaur knowledge, form when remains are buried and gradually replaced by minerals over millions of years.
