Did you know?

- Easter is a moveable feast: its date is set by the first Sunday after the first full moon following the spring equinox, so it shifts every year.
- The word "Easter" may come from Eostre, an Old English name associated with spring, though scholars still debate its exact origin.
- In the Southern Hemisphere, Easter falls in autumn rather than spring, since the seasons there are reversed.
- Western and Orthodox churches often celebrate Easter on different dates, since they calculate the holiday using different calendars.
