## Did you know?

- Farmers markets have existed in some form for centuries, long before the modern, organized weekly markets common in many towns today.
- The term "locavore," describing someone who prioritizes locally grown food, was recognized as a real word of the year by Oxford Dictionaries in 2007.
- Buying directly from a farmer at a market typically means more of the money goes straight to the grower, with fewer steps in between than a typical grocery store.
- Many farmers markets operate seasonally, offering a genuinely different mix of produce depending on what is actually ready to harvest at that time of year.
