Did you know?

- The first drive-through restaurants emerged in the United States in the mid-20th century, designed around the growing popularity of cars.
- Standardized menus and preparation steps are part of what allows fast food chains to serve food quickly and consistently across locations.
- Some fast food items are regional or limited-time only, created specifically to test new flavors before a wider rollout.
- Fast food packaging is often specifically engineered to keep food at a certain temperature and texture until it reaches the customer.
