MARIGOLD

Flowers — Answer Key

Did you know?

- A flower's bright colors and scent typically exist to attract pollinators like bees and butterflies, not for decoration.
- Some flowers only bloom at night, relying on moths or bats for pollination instead of daytime insects.
- The world's largest flower, the corpse flower, can grow several feet across and produces a smell often compared to rotting meat.
- Many flowers close their petals at night or during bad weather to protect their reproductive parts.
