Human Body — Answer Key

Did you know?

- The human body is made up of trillions of cells, each too small to see without a microscope.
- Adults have 206 bones, but babies are born with about 300, many of which fuse together during growth.
- The heart beats roughly 100,000 times a day without ever taking a break.
- The skin is the largest organ in the human body.
