APHID

EXOSKELETON

MANTIS

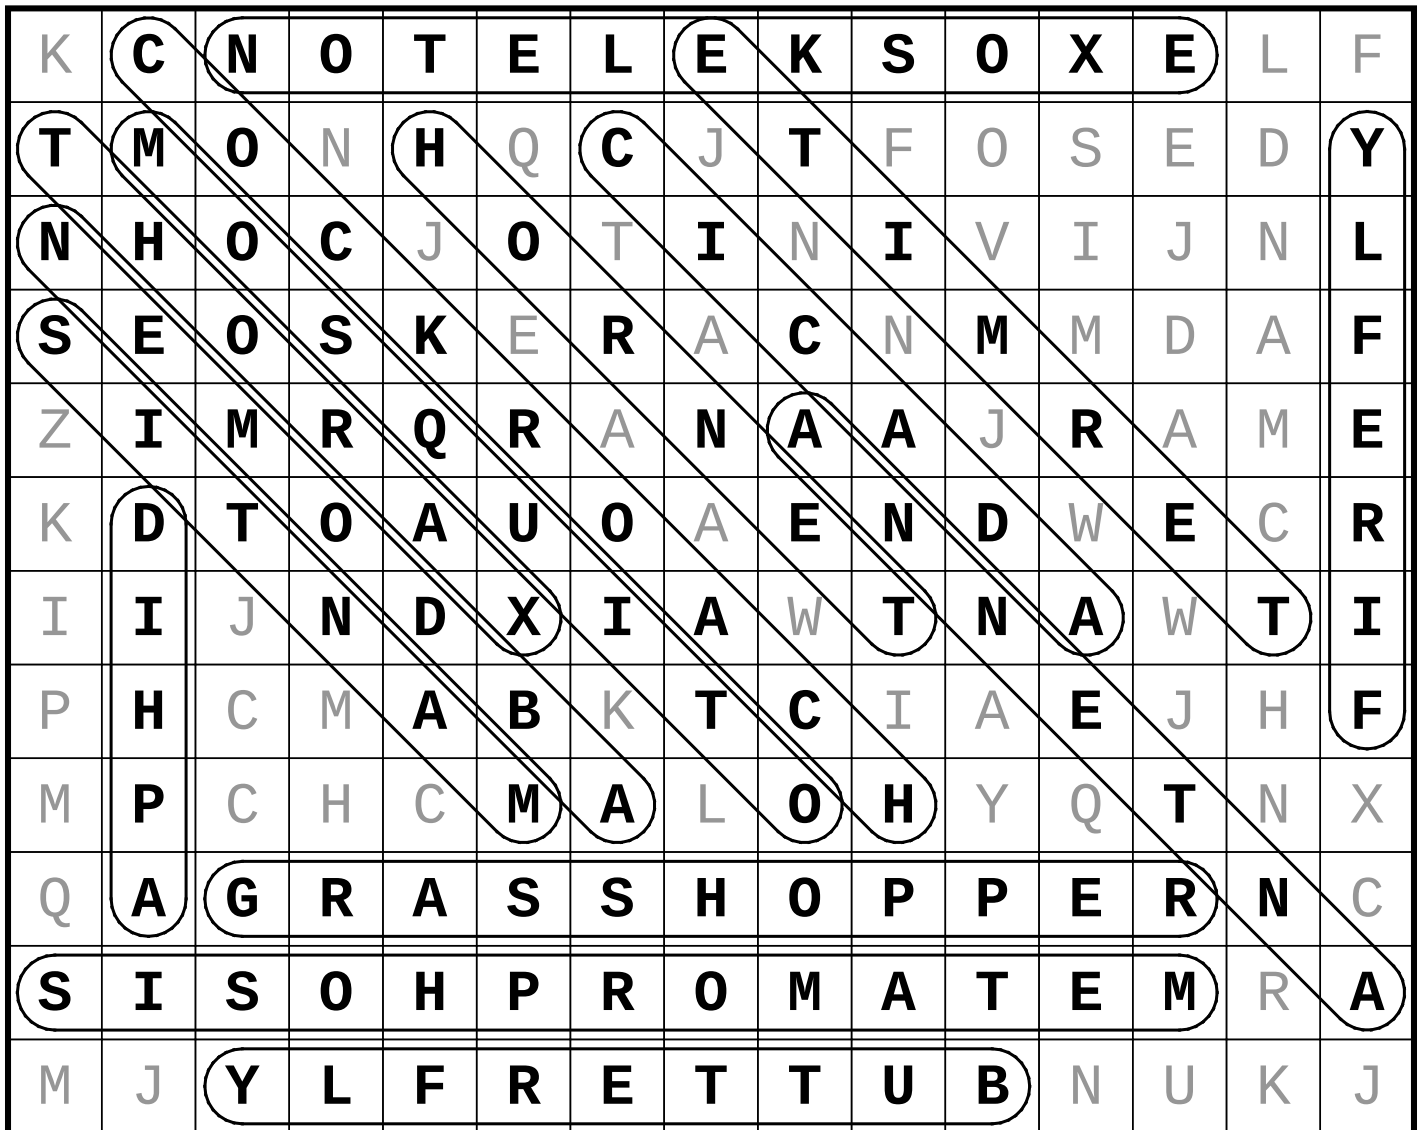

THORAX

BUTTERFLY

FIREFLY

METAMORPHOSIS

Insects — Answer Key

Did you know?

- Insects make up the largest group of animals on Earth, with over a million known species identified so far.
- Ants can carry objects many times heavier than their own body weight.
- A ladybug's spots and bright color act as a warning to predators, signaling that it doesn't taste good.
- Butterflies taste with sensors on their feet, helping them identify the right plant to lay eggs on.
