

Programming & Coding Word Search

Find all 30 hidden programming & coding.

Difficulty **Hard** ■■■■■

Estimated time 🕒 26-49 min

Recommended age Adults & teens

Built for experienced solvers.

Puzzle ID PC-H-215 Version 2026.1

Name _____

Date _____

Completed in _____

Every Modern Word Search puzzle follows a published design specification and is individually reviewed before publication.

Did you know?

- The first computer programmer is widely considered to be Ada Lovelace, who wrote algorithms for a mechanical computer in the 1840s.
- Programmers use precise language to describe errors -- a "bug" and a "glitch" aren't always the same kind of problem.
- Some of the world's most-used software still contains code written decades ago, quietly running behind newer systems.
- Learning to code often starts with printing the words "Hello, World" to the screen, a tradition followed across nearly every programming language.
