Skiing — Answer Key

Did you know?

- Skiing began thousands of years ago as a practical way to travel across snow, long before it became a recreational and competitive sport.
- A ski resort's trail difficulty ratings, like green circles and black diamonds, are a real, standardized system, though the exact difficulty can vary somewhat between resorts.
- Moguls, the bumps skiers navigate on certain runs, form naturally as skiers repeatedly turn in roughly the same spots, pushing snow into ridges.
- Cross-country skiing and downhill skiing use genuinely different equipment and technique, since one is built for distance and endurance and the other for speed and descent.
