Did you know?

- A state's capital isn't always its largest or most well-known city; Albany, not New York City, is the capital of New York.
- Some state capitals were specifically chosen for their central location within the state, making them easier to reach from all directions.
- A handful of U.S. state capitals have changed at least once since statehood, as states grew and populations shifted.
- Some state capitals share part or all of their name with the state itself, like Oklahoma City in Oklahoma.
