CAULIFLOWER

LEEK

SHALLOT

Vegetables — Answer Key

Did you know?

- Carrots were originally purple or yellow; the now-common orange variety was popularized more recently in the Netherlands.
- Potatoes, when exposed to light, produce a compound that turns their skin green and can taste bitter.
- Broccoli, cauliflower, cabbage and kale are all different cultivated varieties of the same original plant species.
- Onions release a gas when cut that irritates the eyes, triggering the body's natural tearing reflex.
